Abstract (en)

[origin: WO9503918A1] A shaping machine (101) for lenses (104) made of an organic material, in particular but not solely corrective lenses, which reaches a uniquely high productivity either for quantity or quality, comprises, on a framework (102), a lens plate holder (103) rotatable about a rotation axis (R-R) and adapted to support a lens (104) to be shaped and a template (109) coaxial with said axis (R-R), and a machining set (110) including a milling head (111) with a shank cutter (114) and a feeler (112), said machining set (110) being carried on the framework (102) in a movable manner toward and away from the rotation axis (R-R).
