Abstract (en)

[origin: EP0713656A2] A ski boot comprising a shell (2) that is constituted by a first element (5) and by a second element (6) that are asymmetrical with respect to the longitudinal median plane of the shell. The first element and the second element can also mutually partially overlap so as to allow optimum foot and leg securing, and also to walk satisfactorily although the quarter and the shell are fastened. <IMAGE>
