Abstract (en)
[origin: EP0713910A2] There is provided a detergent composition containing: (a) a source of peroxide compounds (b) a peroxyacid bleach precursor composition comprising i) an organic peroxyacid bleach precursor compound, ii) an H₂O₂ scavenging material, wherein said organic peroxyacid bleach precursor compound and said H₂O₂ scavenging material are in close physical proximity within said composition. The composition is useful in the bleaching of stains from stained coloured fabrics. The H₂O₂ scavenging material acts to inhibit 'patchy' fabric discolouration to said fabrics during the stain bleaching process.
