Abstract (en)
[origin: EP0714153A2] The housing (1) of the lampholder has an opening (2) for introduction of a lamp whose centre contact engages with a leaf spring (8) while the rim of its base is contacted by an earthing spring (7). The live wire and earth wire of a power supply are terminated on spaced-apart contacts (6,5) and retained by screws (4). The ends of the leaf spring and live contact are provided with dents (11) for the leads of a voltage-dropping resistor (9). The diode (10) is inserted between the earth contact and the lower end of the earthing spring.
