Abstract (en)
The shears have gripping eyes with at least one made of a non-metal material which is noticeably elastically deformable by operating forces occurring during normal use. The elastic material has a Shore hardness of approximately 83 to 87, and may be of rubber. The gripping eye has a neck (8) on its outer circumference on the side facing the corresponding blade (4,5), and which in the cutting plane perpendicular to the blade axis forms a support length (SL) of at least 50 per cent of the internal eye diameter (D) for connection to the blade.

Abstract (de)
Die Schere, insbesondere für Friseure, umfaßt im wesentlichen in Schneidenrichtung sich erstreckende und allenfalls um einen geringen Winkel auseinanderstrebende Halme (4,5) sowie vor deren Enden angeordnete ringförmige, in der Schneidebene sich erstreckende Griffaugen (6,7) aus unter den im Normalbetrieb vorkommenden Betätigungskräften noch merklich verformbarem elastomeren Material. <IMAGE>
