Abstract (en)  
[origin: WO9506703A1] A storage stable, colour change-inhibiting, liquid textile washing product has 100 to 2000 mPa.s viscosity (at 20 DEG C) and contains water-soluble protein derivatives selected among protein-fatty acid condensates, protein hydrolysates and cationically derived protein hydrolysates. Also disclosed is the use of said protein derivatives as colour-transfer-inhibitors in textile washing products, preferably liquid textile washing products, and as viscosity regulators in liquid textile washing products.
