Abstract (en)

[origin: EP0716204A2] The elongated U-shaped support profile of the sealing bar comprises a compressible sealing strip in a duct-shaped profile cavity. It also has a cover strip releasably held at the edges with an adhesive strip, protected by a removable foil, at one side. The support profile (11), from which extends a fitting accessory (23), has plug members (24,25) on the side away from the accessory. The plug members are also located on the cover strip (12) which can be removed from the support profile open side. In the useful position, the cover strip extends on the support profile with a side protrusion.
