Abstract (en)  
[origin: EP0716437A1] The rocker switch is housed in the modular box (1) which is moulded and has enclosed wire connectors (20,21) at each end. There is a central sliding section (40) inclined at an angle to the box wall. The slider has moving contacts (34,35). There are fixed contacts (30E,31D), making contact with the sliding contacts. A manual switch (4) is housed in the top of the modular unit, and attached to the sliding unit by a block (7), to move the slider up and down and make contact.
