Abstract (en)
[origin: WO9600927A1] A portable photographic lighting stand consisting of a frame (1) with a plurality of separate multidirectional holders (8) with positionable light sources (6) of which the angles can be simultaneously adjusted manually or via directly or remotely controlled motors. The lower ends of the frame (1) are shaped into height-adjustable legs (22, 23) providing stability and contacting a bearing surface. The lower crossbar (2) of the frame (1) has a movable and tiltable supporting plate (12) on which a photographic device (10) is fixed. Said stand may be used outdoors or indoors by lighting professionals and amateurs, e.g. for portraits, close-ups, micro- and macrophotographs and other close-in shots.
