Abstract (en)  
[origin: EP0717200A2] The piston rod (11) is movable in relation to the piston (6). The mobility of the piston rod in the direction of the pressure exerted on the surface (15) of the piston is restricted by stop pieces (16,18) on the piston and piston rod. The stop pieces are pre-tensioned with pre-set force at least partially by a pre-tensioning spring (14). The piston rod penetrates the piston and has a stop piece (18) opposite the piston surface acting partly as a piston-side stop piece.
