Abstract (en)

A vehicle door lock (1) presenting a lock mechanism (3); an outside release lever (5); a safety lever (8) movable between a first stable position disabling outside release, and a second stable position enabling outside release; and an inside release lever (6) movable between a first idle position (a), and a second position (b) wherein it cooperates with and releases the lock mechanism (3); the safety lever (8) presenting a shaped slot (22) engaged in sliding manner by a pin (21) on the inside release lever (6), so that the safety lever (8) is moved between the first and second stable positions when the inside release lever (6) is rotated between the idle position (a) and a third intermediate position (c). <IMAGE>
