Abstract (en)
[origin: WO9532644A1] Desk structure having a longitudinally extending beam (82, 82a) and a desk top (21a, 21b) supported on supports (22a, 22b, 22c) extending laterally of the beam (82, 82a) and resting on a floor. The supports (22a, 22b, 22c) connect slidably with the beam (82, 82a) to support the desk top (21a, 21b), and couplings (87) connect the supports (22a, 22b, 22c) to the beam (82, 82a) to be slidably adjustable along the beam (82, 82a). The support (22a, 22b, 22c) is a hollow casing (23) having a side panel (31) that is detachable to allow access to the interior of the casing (23), and a lower side (29) having an opening (36) so that the support (22a, 22b, 22c) can be positioned to receive wiring (37) and the like from floor outlets in order to conceal and confine such wiring (37).
