Abstract (en)

[origin: WO9533105A1] The process for gluing cut sections of mineral wool panel, especially lamellar mineral wool panel, on a backing using an adhesive mortar, involves first precoating the entire surface of the cut sections with a thin layer of adhesive mortar or aqueous plastic dispersion and, after setting, either applying adhesive mortar in beads or toric form and gluing to the backing or pressing the cut sections into an adhesive layer that was machine-sprayed onto the backing beforehand either in beads and/or in toric form or over the full surface.
