Abstract (en)
[origin: EP0719574A2] The guide surface (10) is of one-piece structure with the head (3) or the shaft (2). Alternatively, it can be formed on an intermediate piece (6) connectable with the head or the shaft. The intermediate piece is adjustably fixed to the head or shaft. The guide surface is adjustably fixed to the intermediate piece. The guide surface is formed from at least one leaf spring (11a,11b) or at least two such springs arranged one above the other with varying lengths. The guide surface is formed on a shaped body made of metal or plastics material. The shaped body is of one-piece structure with the intermediate piece.
