Abstract (en)

[origin: EP0458131A1] A photographic processing composition containing at least one compound represented by formula (I) <CHEM> wherein R, R1 and R2 each represent a hydrogen atom, an alkyl group or an aryl group; and L1 represents an alkylene group or an arylene group. Also disclosed a processing composition for a silver halide color photographic material containing a metal chelate compound formed from a compound represented by formula (I) and a metal salt selected from salts of Fe(III), Mn(III), Co(III), Rh(II), Rh(III), Au(III), Au(II) and Ce(IV). A method is also disclosed for processing a silver halide photographic material with the processing compositions.
