Abstract (en)

[origin: EP0720916A2] A printer (10) having an ink supply identification system includes an ink supply (26), an ink supply identification corresponding to the ink supply, a memory (20) to store the ink supply identification and printer data, a control device (22) for comparing the ink supply identification to the printer data stored in the memory and for controlling the operation of the printer in response to the ink supply identification, and a print element (54) connected to the ink supply and the control device. The printer has increased reliability that enables a high quality printed image to be produced consistently. <IMAGE>
