Abstract (en)

Conveyor device for spools, for handling said spools on a coning machine, with spool carrier disk means (1), wherein the means for handling the spools to be processed are constituted by a drive means (10) which is caused to horizontally circulate along a closed loop defined by pairs of guide means which engage said spool carrier disk means (1), with said drive means being provided with pushing means (13) which cause the carrier disks (1) to move causing them to slide along the support plane (14). <IMAGE>
