Abstract (en)  
[origin: EP0722680A2] Each drawer frame piece (2) has only one single protuberance (26) on the lower horizontal arm (24) of the lateral U-section. The protuberance fits into a groove (17) above it and is positioned at or near the front end of the horizontal arm. The fixtures attaching the drawer frame pieces to the front panel have a flexible element enabling the frame pieces to tilt on the front panel without coming out. The back ends of the drawer frame pieces have lateral pins fitting into openings in one side arm of the back wall.
