Abstract (en)

[origin: EP0723040A1] A jacquard harness has three shed positions (Uf, MF, OF) produced by two lifters (1,2) with a hook and knife (4,5) arrangement which operates the cord connectors (3). A control device (7) deflects none, one or both lifters (1,2) according to the pattern selection to achieve the three shed positions (UM, MF, OF).
