Abstract (en)
[origin: EP0723052A2] The handrail has elements (1,15) with installation holes to accept fastening screws (19), and supports (32) for mounting on a wall or similar surface. Each hole is arranged in a connector, on at least one end of an element. The connector can be laid on a surface (41) of a support. The connectors of two adjacent elements can be engaged with one another, and can both be fastened to the support using a single screw. The connectors and the screw can then be covered with a cap (46), which can also be connected to the support.
