Abstract (en)  
A fastening device that can be used particularly for sports shoes with laces, such as for example snowboarding boots, climbing boots, trekking boots, or skating boots. The device includes a first pair of locking elements (10a,10b) that are associated with the first flap (5) and the second flap (6) to be joined of the shoe, and a second pair of guiding elements (12a,12b) that are associated with the first (5) and second (6) flaps. Each one of the first and second pairs of locking and guiding elements is associated with the first and second flaps and is arranged at a same directrix (13). It is thus possible to adjust the degree of fastening in desired regions, according to the specific sport. <IMAGE>
