Abstract (en)  
[origin: EP0513456A1] A system for operator-unassisted checkout of randomly disposed articles (12) in a container (10) in a checkout area (14) of a supermarket or the like, performed without contacting the articles in the container, includes, associated with each article, respective transmitters (20) for transmitting product-identifying data (26) upon actuation and then deactuating itself. Associated with the checkout area are an actuator (42) for actuating all of the transmitters in the container and a receiver (44) for receiving the transmitted product-identifying data from each article in the container in turn and identifying the total cost of the articles in the container. <IMAGE>
