Abstract (en)

[origin: WO9511603A1] Cross country ski shoe consisting of an upper (1) integral with a sole (5) having securing and articulating means (8) on the upper part of the foot-bearing surface of the ski. Said means is located near the front end of the sole (5). The bottom side (6) of the sole (5) also comprises a second fastening means (9), arranged in the area between the heel and the metatarsophalangeal joint, capable of cooperating with a complementary fastening means arranged on the upper part of the foot-bearing surface of the ski.
