Abstract (en)

[origin: WO9320735A1] A liquid container such as a receptacle (1) with a water bath for warming baby bottles, a baby bottle (8) or a bottle. The wall of the receptacle comprises a vertical groove (1) facing the heating liquid and receiving a member (4) supported by a spacing holder and having a built-in thermometer (3) containing an expandable liquid or liquid crystals, said member (4) enclosing the thermometer (3) being made of the same plastic or glass as the baby bottle (8) or the bottle, or as the baby bottle (8) or the bottle to be heated by the bottle warming receptacle (1), and having a corresponding thickness.
