Abstract (en)
[origin: WO9513223A1] A dispenser (5) for fluent material such as granular or powdered coffee and tea can either form part of the container (1) for the material or it can be separate from the container (1) and be temporarily fitted to the container (1) by the user. It comprises two chambers one of which (27A) is adapted to receive a predetermined quantity of the fluent material from the container (1) when the container (1) is tipped in one direction and the other of which (27B) is adapted to receive a different predetermined quantity of the fluent material from the container (1) when the container (1) is tipped in another direction. There are no moving parts, and outlet means (15) permit the predetermined quantity of fluent material to be discharged from the dispenser (5).
