Abstract (en)
[origin: WO9323648A1] The invention relates to a laminate structure (10) having an alarm mat (2) integral therewith. The laminate is intended particularly for the construction of security containers and security rooms and the alarm mat (2) is constructed from one or more insulated, electrically conductive threads, wires, filaments and the like (5, 5'), or from one or more light-conducting optical fibers. The thread or threads (5, 5'), or the optical fibre or fibres, is/are disposed in the form of continuous meshes, loops or eyes, for instance of the kind obtained when knitting, crocheting or weaving. The laminate structure (10) has at least one outer layer or sheet (1) which is connected to the alarm mat (2). The invention also relates to a use of the laminate structure (10) in the construction of a container casing or in the construction of a space or room (40) in which objects to be protected from unauthorized access are stored.
