Abstract (en)
[origin: DE19504094C1] The case (1) has a back (4) and a front (5) wall. The walls fold over the side edge (9) of the inserted inner container (3). The wall part (2) in contact with the front wall is positioned on the back (4), at least along the other side edge (10) of the inner container. The case has bend lines (11a,12a) congruent with transverse folds (11,12) in the inner container. A snap-in top (15) acts as lid. The rim of the wall of the inner container runs diagonally over the back of the case. An extra removable sack-insert (7) at least partly containing the bag-shaped inner container is positioned at least in the collector-part (14).
