Abstract (en)

A shelf carrier means comprises a suitable wall-fastening base element (11) which can be submitted to horizontal adjustment movements in accordance with the directions shown by arrow (15) and oscillation adjustment movements around its fastening point according to the directions shown by arrow (16). On said base element mutually opposite, mutually spaced apart clamp elements (12, 13) are provided for clamping a shelf (20, 21). Said clamp elements can be independently adjusted in vertical direction according to the directions shown by arrow (19), hence with possibility of being moved towards, or apart from, each other. <IMAGE>
