Abstract (en)

[origin: EP0726351A1] A process is for finishing the ironing surface (2) of an iron base (1) made of a thin metal sheet. The inside (4) of the base (1) can be fastened on an iron shoe (6) in a way that ensures good conductivity of heat. The outside of the base (1) forms the ironing surface (2). Before the fastening of the base (1) to the shoe (1), the finishing process is carried out by means of sandblasting. Both the inside (4) and the outside (2) of the base (1) are blasted.
