Abstract (en)

[origin: EP0726359A2] The rail track comprises a track foundation construction (2), two rails (10), a rail head (11), a rail cross piece (12) and a rail foot (13). Rail chambers (14) are fixed on the foundation construction by rail foot fixing devices (20) having a clamping head (21) and a coupling (25). Rail chamber filling devices are provided. They comprise rod-type filling bodies (32) consisting of rubber particles with polyurethane binding. The filling bodies have a width which complies with the rail foot fixing devices and a height which reaches at least until the underneath of the rail head.
