Abstract (en)
[origin: EP0726425A1] The built-in kitchen equipment in which the cooling air conduction system (11,29,31,55) is so arranged that the cooling is limited to the front region between the housing (3) and the kitchen unit (51), and to the electrical elements (21). A closed cooling chamber is fitted above the cooking chamber (5). The suction and/or blower openings (31,37) are formed in the front region of the side wall (17) of the housing. The cooling air fan (23) produces a negative pressure to suck in cooling air.
