Abstract (en)

[origin: WO9511353A1] The invention relates to water closet sanitary devices. The invention concerns, in particular, an automatic cleaning bowl device for a sanitary facility characterized in that the bowl (1) is rotatably mounted on the structure (2) and is rotated under the cleaning head (18) during the washing operation when cleaning head (18) adopts an advanced position over the bowl and the seat thereof (6). The cleaning head includes two nozzles which are supplied with washing fluid, for example, water, and move above the inner bowl surface and above the seat (6). A third nozzle is provided for drying the seat.
