Abstract (en)

The basic control program is matched to particular conditions of washing and begins with a preliminary rinse, followed by a hot cleansing rinse with opt. partial emptying and refilling, one or more intermediate rinses and a pure-water rinse. Water supply to the rinsing liq. container is controlled and the liq. is pumped out after the rinses. A load-dependent wetting value corresp. to the water requirement is worked out, and the program is varied for lighter loads in accordance with the actual wetting value.

Abstract (de)

Bei einem Verfahren zum Betreiben einer Geschirrspülmaschine wird ausgehend von einem Grundspülprogramm zur Wasser- und Energieeinsparung eine beladungsabhängige Änderung des Grundprogramms durchgeführt.
