Abstract (en)

[origin: EP0728594A1] Provided is a recording paper, especially suitable for full color ink jet recording, having on one side of a base paper a recording layer comprising at least a pigment and a water-base binder, wherein the specific surface area of the pigment, S_w , determined at the void rate epsilon of 0.8 by the constant-pressure air permeability method and the thickness of the recording layer, L , satisfy the following relation:
