Abstract (en)

[origin: EP0728681A1] The control system detects the weight of the load provided by the rubbish bin (2) and its contents, with the load limits of the lifting drive (3) determined for selecting the movement rate of the lifting and emptying movement. Pref. the lifting drive uses a hydraulic piston/cylinder device coupled to a lever mechanism, with the load detected by measuring the hydraulic pressure of the piston/cylinder device.
