Abstract (en)
[origin: US5961100A] PCT No. PCT/DE94/01331 Sec. 371 Date May 17, 1996 Sec. 102(e) Date May 17, 1996 PCT Filed Nov. 10, 1994 PCT Pub. No. WO95/14144 PCT Pub. Date May 26, 1995A fence comprises posts and lattice panels which are fixed at their vertical edges to the posts. The post carries, on its front side, hooks, on which the horizontal bars of the lattice panels rest. The lattice panels are clamped between the front side of the post and the rear side of a hollow front profile which have on the rear side, at the locations of the hooks, holes, into which hooks penetrate with a leg directed obliquely outward and upward. The upper hole edges slide downward on the slope formed on the upper side of the legs and at the same time displace the front profile toward the post. The front profile is pressed downward by a holding-down device.
