Abstract (en)  
The cap, comprising a crown (11) and a peak (12), has lenses (30) which can be deployed in front of the wearer's eyes or retracted into a pouch (60) situated behind the front of the crown, the pouch being equipped with a closure such as a sliding clasp fastener or Velcro (RTM) adhesive strip. Each of the lenses can be connected to a slideway (41) which enables it to be moved between deployed and retracted positions, or mounted on a hinge with its axis parallel to the joint between the cap crown and peak or perpendicular to it. In another variant, the lenses, can have upper edges which fit into a dovetail-section groove in a rail beneath the peak of the cap and from which they are removed before stowing in the pouch.

Abstract (fr)  
La présente invention concerne une casquette comprenant une coiffe, une visière et des lunettes, notamment des lunettes de soleil. Elle est caractérisée en ce que le ou les verres (30) desdites lunettes sont prévus pour être escamotés et pour être rangés dans une poche (50, 60, 70, 80) arrangée à l'arrière de la partie frontale (11a) de la coiffe (11). <IMAGE>
