Abstract (en)
[origin: EP0730840A2] The dust filter bag and blower unit are installed in separate trough-shaped compartments (2,3), sepd. by the partition (4) in which an aperture (6) is provided with a grid (5). The blower compartment (3) has a space for the cable drum segregated behind an intermediate wall (7). The dust collector is coupled through an inlet port (10) to a projection (9) from its compartment (2). Wheels are fitted to lateral projections from the longitudinal walls of the casing. A silencer can be fitted into a rear opening (17).
