Abstract (en)

[origin: EP0731036A2] The lid consists of cardboard and has a flat section (22) along its outer side. This engages at least indirectly on the edge of the cylindrical jacket (3). The lid also has two projections on the flat section. These extend into the interior of the package and support themselves on the inside of the jacket. The lid may consist of two parts, the flat section and a second section (24) with the projections. Three star-shaped ribs (25) engage on the lower face of the flat section, with undercuts located directly on the surface of the section. The outer edges of the ribs support themselves on the inside of the jacket.
