Abstract (en)

[origin: EP0731223A1] The mounting is for a water-closet bowl etc. It has a profiled frame (1) to which the bowl is fixed, and which is fixed to a wall, floor, stand etc. The frame is formed from a flat sheet-metal front wall (2), and whose edges (6-9) are bent over rearwards to form a closed enclosing L-section frame. All necessary openings fixing holes etc. are formed directly in the sheet-metal. The edges can be bent at right angles to the front surface and joined together at the frame corners (10-13), esp. by welding or the formation of teeth engaging one behind the other.
