Abstract (en)
[origin: EP0732294A2] The device has a frame with pocket rails (9), driven elements (13) to move the pockets and pocket clamp units (10,19,20). guide elements (6,7,8) are located on the frame sections, within the movement path of each pocket. A guide rail (5) on one longitudinal side of each pocket is guided by the guide elements. Clamp units (10) act with the guide rails. Actuating elements for the clamp units are located on one frame section (A) only. The guide elements contact of rollers, which are held rotating on one frame section.
