Abstract (en)
[origin: EP0732467A1] The injection packer is for longitudinal inner bores in brick, concrete, wood, etc. constructions. It comprises a closure element with bond increasing anchoring members. The closure element is formed as a spring loaded valve ram (10) whose punch head (12) is secured within the closure element front end wall (17) which is inserted into the bore hole (3). Brackets (8) are provided inside the longitudinal hole (7) of the packer to act as a seating for a punch spring (9).
