Abstract (en)
[origin: EP0732538A2] Up to three reflectors (6b-8b) are mfd. of laminated and coated material with differently oriented contiguous facets (38b,39b). The faceted reflector can be sealed into a housing (22b) and moved with it and/or w.r.t. the other reflectors e.g. for maintenance purposes without need to remove the glass (32b). The holders (e.g. 12b,14b,15b) can be moved into different relative positions esp. by means of an adjustment device which varies the distance and direction of the reflector carrier w.r.t. a reference plane.
