Abstract (en)

[origin: EP0732644A1] A control device for a household electrical appliance allowing easy viewing of signs (13) carried by a sign-carrying element (6) associated with a knob (4) for controlling the appliance operational functions, in which the sign-carrying element (6) is cup-shaped and is mounted rockable on the operating shaft (1A) on which the knob is mounted, said element (6) cooperating with a fixed thrust member (7) acting on the lateral surface (35) of the element (6), so as to maintain this latter in a position such that its longitudinal axis of symmetry (W) cuts the axis of rotation (F) of the knob (4) at an angle (α) which remains substantially constant for any position of the knob. <IMAGE>
