Abstract (en)  
[origin: WO9516257A1] The folding frame consists of several spars (1-4) forming a polygon, in which each spar consists of a lower section (5), an upper section (6) and at least one spring component (7). The fitting of a supporting strip (18) at the free end of an inner web (22) provides a good vertical distance between the poster (9) or the like to be fitted in the frame and the supporting surface (34) and hence good rear ventilation.
