Abstract (en)

A container base (10) for receiving interchangeable cups or pans (11), particularly but not exclusively for cosmetics products, in which the pan (11) is retained in place by freely releasable retention means. Said retention means consist of the combination of: at least one elastically yieldable vertical section (13) extending from said base (10), snap-retention means (14, 15) acting between said section (13) and a first side of said pan (11), engagement means (16, 17) provided on a second side of the pan (11) opposite the first and acting between the base (10) and the pan (11), and counteracting means acting between the base (10) and the pan (11). <IMAGE>
