Abstract (en)

[origin: EP0733767A2] The frame (4) holding the one or more panes (5,6) of glass is swivelably fitted on a fixed frame (3) and has a lower support (7) for the panes adjusting the thickness (d) of the panes. The fixed frame (3) has a further adjuster (8) for adjusting the thickness of the panes. The lower pane support (7) comprises a strip (9) whose base has a hook part (10) to hang with positive engagement from an associated recess (11,11') of the glass frame (4) corresponding to a certain pane thickness. In the assembled state the hook fits snug in the recess. The base of the support strip can have a screw connection with spacer.
