Abstract (en)

[origin: WO9516841A1] Batonvrille= beach-umbrella holder designed and invented by INDRIIO Domenico takes away the difficulties of putting the present type of umbrella holder into the sand because it enables the holder to be put into sand easily, to the required depth, with a simple rotatory movement and to be firmly held, thus surpassing the existing technology, since it guarantees against wind, injury and pollution. It is made up of a lower sleeve (1) with helicoidal blades, a tubular stick (2) and of an upper sleeve (3) with a cam blocking handle system (4).
