Abstract (en)

[origin: EP0734665A1] The bunk bed has lower (9) and upper (8) beds articulated on a frame (1) with two parallel horizontal axes (1,11). The beds can move between a vertical folded position and a horizontal use position. The frame has a ladder (16) to engage the floor and with fixings to engage the two beds. It has detachable mountings (23-26) to at least one of the beds in a horizontal position of the latter. The fixings block the ladder in a degree of freedom different to the vertical direction.
