Abstract (en)

[origin: EP0734677A2] The inner space (6) of the housing (1) accessible from the front with its dims. and the form of its limiting side walls (7) is so formed, that the toilet utensils, viz. toilet roll or packet holder (2), possibly with a cover (8), the container for moistened toilet paper (3) and toilet brush (4) with accommodation container (5), can be selectively inserted in it, but at the same time releasably one above the other. A suspension device is provided for the releasable insertion of the toilet utensils. It has holed plate inserts (9) on the inner surfaces of the side walls of the housing, on which the toilet utensils are releasably fixable by a clip connection.
